CHURN ANALYSIS | Telecom Data

KEY INSIGHTS

Key findings and actionable opportunities from customer churn analysis.

01 Overall Churn

Out of **6,418** customers, **1,732** have churned, resulting in a churn rate of **26.99%**.

02 Gender

Female customers have a higher churn rate **(64.15%)** compared to male customers **(35.85%)**.

03 Contract Type

Month-to-month customers have the highest churn rate **(46.5%)**, significantly higher than one-year **(11.0%)** and two-year **(2.7%)** contracts.

04 Internet Type

Customers using Fiber Optic internet have the highest churn rate **(41.1%)**, followed by Cable **(25.7%)** and DSL **(19.4%)**.

05 Payment Method

Customers using Mailed Checks have the highest churn rate **(37.8%)**, followed by Bank Withdrawal **(34.4%)**.

06 Top Churn Reasons

Competitor-related factors are the main reasons for churn, including better devices **(289 customers)** and better offers **(274 customers)**.

KEY RETENTION STRATEGIES

01 Target High-Risk Segments

Focus on month-to-month customers and Fiber Optic users with higher churn rates through personalized offers and loyalty programs.

02 Improve Service Experience

Address service quality and customer support issues to reduce churn related to competitor offers and device preferences.

03 Enhance Value & Engagement

Review pricing, introduce value-added plans, and provide better data benefits to improve customer satisfaction and retention.
